### When you use the GemCloud Application;

- We do not have access to any of your private data and neither does anybody else.
- Our database employs state of the art security measures for sensitive data including AES-256 bit hash encryption so nobody is getting to your confidential data except for you.
- Our application uses dual factor authentication to register your computer to your account so you must authorize new devices before they can log in.

🕒 Registration takes less than 2 minutes
